## **\$2m for schools**

The Government will provide more than \$2 million in additional expenditure for grants and allowances for private non-profit-making and aided secondary schools for the seven-month period ending March 31, next year.

It is estimated that the total additional expenditure will amount to about \$3.6 million for a full financial year.

"The higher grants take account of increases in prices of various essential items required for the operation of classes," a Government spokesman said.
