## Bid to create MACs with factory owners, operators

The Kwuntong District Office is making an attempt to create Mutual Aid Committees with factory owners and operators.

"The formation exercise aims at improving management, environment and security in the industrial area," said Mr. Eric Choi, the Assistant City District Officer.

At present the District Office is conducting a survey within its industrial

sector to ascertain the possible number of MAC's.

"There are about 500 industrial buildings in Kwuntong and we expect the formation of just over 200 MAC's there," added Mr. Choi.

There are already 300 MAC's in the residential areas of the district.

A recent four-week clean-up operation in the industrial area had successfully created a visual impact on workers and fac-

tory owners of the difference after the clean-up, said Mr. Choi, citing an example of environmental improvement.

"It is hoped that with the formation of these MAC's, and with their operation, the improvement will be maintained.

"It is also to the industrialist's benefit to have closely knitted MAC's which can ensure the security of the premises," he added.
